What is Collateral Protection Insurance?

- Provided By Dealers to Customers who can not provide full coverage insurance for a vehicle
- Provides the customer's vehicle with the proper coverages a Dealer requires to adequately protect their asset

CPI is available from your insurance company. If you are unable to obtain coverage from your auto insurance company the dealer will place this coverage for you.

This gives the dealer more options.

With CPI you have more choices to chose from, both with coverage and on the car lot

RIVERPOINT PROTECTING YOUR ASSETS

Riverpoint Collateral Protection Insurance is physical damage insurance tailored for the BHPH and special finance environment. It is designed with the understanding that lender-placed insurance can be a valuable tool for subprime lenders but that premiums are often difficult – sometimes impossible – to collect if the premium is added midterm to the customer's loan.

Riverpoint CPI is structured to allow lenders to address the important issue of physical damage insurance, including the exact cost of collateral protection coverage, before the car leaves the lot. Easy collateral enrollments and monthly premium billing make the program both simple to administer and highly cost effective.

"When an insurance company says no, we provide products for customers and dealers to get the right collateral insurance coverage at the right price."
